Guildford, UK | +44 7771602273 | atriya0712@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

UK Graduate Visa – Valid until October 2027

PROFESSIONAL SUMMARY

Computer Science graduate with hands-on experience in compliance monitoring, auditing and operational risk controls within an Amazon DSP environment. Experienced in maintaining audit trails, identifying compliance exceptions, implementing preventative controls and escalating risks to senior management. Academic background in Information Security Management and Computer Networking, supported by Cisco CCNAv7 certification. Seeking to apply technical and compliance experience within Cybersecurity, GRC and Technology Risk.

TECHNICAL SKILLS

Governance, Risk & Compliance: Compliance monitoring, audit support, evidence & audit trails, control checks, risk identification, exception management, issue escalation, process controls

Cybersecurity: Information security fundamentals, CIA Triad, threats & vulnerabilities, security controls, access control fundamentals, data protection & privacy principles

Networking: TCP/IP fundamentals, OSI model, IPv4 addressing, subnetting, routing & switching fundamentals, network protocols

Data & Reporting: Excel, Google Sheets, SQL (Intermediate), KPI reporting, data validation, PivotTables, conditional formatting, XLOOKUP/VLOOKUP, INDEX/MATCH

Technical Tools: Python, Git/GitHub, Google Workspace, Amazon Cortex, Slack

PROFESSIONAL EXPERIENCE

Recruitment & Compliance Manager, Leopard Logistics – Amazon DSP Oct 2025 – Present | Guildford, UK

- Conduct weekly compliance audits across 60+ driver records, validating 7–8 requirements including right-to-work documentation, driving licences, background checks, signed agreements and training records, contributing to an improvement in overall compliance from approximately 65% to 95%.
- Maintain structured compliance evidence and audit trails in Google Sheets, tracking document validity and expiry dates, identifying exceptions and escalating non-compliance to senior management for investigation and resolution.
- Identify operational compliance risks and implement preventative controls, including a pre-deployment verification check to ensure required driver agreements are completed before drivers are permitted on road.
- Built and maintain a ClearQuote monitoring tracker covering 80+ drivers daily, improving visibility of outstanding van checks and contributing to an increase in completion from approximately 30% to 90%.
- Manage compliance controls throughout the recruitment and onboarding lifecycle, including licence eligibility, right-to-work verification, background checks and required documentation across 30+ applications per week.

Data Analyst Intern, Uptrail

Jun 2025 – Jul 2025 | Remote

- Used Python, SQL and Excel to clean, validate and analyse datasets, including duplicate removal, missing-value handling and structured querying.
- Improved data-processing and reporting workflows, reducing manual data-cleaning effort by approximately 40% and contributing to an approximately 30% improvement in reporting efficiency.

Data Analyst Intern, MeriSKILL

May 2024 – Jun 2024 | Remote

- Used SQL, Excel and Power BI across two analytical projects, performing data cleaning, validation and exploratory analysis before producing dashboards and visualisations.
- Analysed structured datasets, including healthcare/diabetes data, and communicated findings through data-driven reporting and visualisation.

Computer Lab Assistant, Asia Pacific University

Oct 2023 – May 2025 | Part-Time

- Provided technical support to 200+ students across Python, SQL and C programming, troubleshooting technical issues and helping users resolve programming problems.
- Explained programming, database and technical concepts to users with varying levels of experience, developing strong technical communication and problem-solving skills.

PROJECTS

CancerXAI — Multi-Cancer Subtype Classification Platform

Final-Year Project | University of Surrey | Sep 2024 – May 2025

- Developed and deployed an end-to-end machine learning application for cancer subtype classification using Python, Scikit-learn, PyTorch, Django and React.
- Processed 100,000+ gene-expression features, comparing SVM, Random Forest and Neural Network models to improve classification accuracy from 65% to 80%, while applying PCA to reduce dimensionality by 95%.
- Implemented SHAP explainability to improve transparency and interpretability of model predictions; project awarded a First-Class grade (70%+).

Echoes of Change — Volunteer Engagement Platform

University Group Project | Feb 2024 – May 2024

- Developed a Django-based volunteer engagement platform within a four-person team, contributing across requirements analysis, development and testing throughout the software development lifecycle.

EDUCATION

BSc (Hons) Computer Science — 2:2

University of Surrey | 2023–2025 | Guildford, UK

- Final-Year Project: First-Class (70%+) — CancerXAI: Multi-Cancer Subtype Classification Platform
- Relevant Modules: Information Security Management, Computer Networking, Database Systems, Advanced Algorithms, Software Engineering Project, Web Applications Development, Artificial Intelligence

Foundation in Computing & Year 1 BSc (Hons) Computer Science Asia Pacific University | 2021–2023 | Kuala Lumpur, Malaysia

- GPA: 3.62/4.00
- Relevant study included Operating Systems & Computer Architecture, Databases, Systems Analysis & Design, Python Programming and C Programming

CERTIFICATIONS

Cisco Academy CCNAv7: Introduction to Networks — 2023

The Complete SQL Bootcamp: Zero to Hero — Udemy | 2025

Microsoft Excel: Excel from Beginner to Advanced — Udemy | 2025

Tableau A-Z: Hands-On Tableau Training for Data Science — Udemy | In Progress

ADDITIONAL INFORMATION

Languages: English, Bahasa Malaysia, Tamil

Volunteering: Kechara Soup Kitchen; Techstars Startup Weekend; University of Surrey Freshers Angel & Welfare Watch
