

ATRIYA SIVAKUMAR

Guildford, UK | +44 7771602273 | atriya0712@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

UK Graduate Visa – Valid until October 2027

PROFESSIONAL SUMMARY

Computer Science graduate with hands-on data analysis experience across Data Analyst internships and operational environments. Skilled in SQL, Excel and Google Sheets, with practical experience in data cleaning, dashboard development, KPI reporting and process improvement. Currently use data-driven reporting and advanced Google Sheets solutions to support operational decision-making within an Amazon DSP. Completed a First-Class final-year machine learning project involving predictive modelling and explainable AI.

TECHNICAL SKILLS

Data & Analytics: SQL (Intermediate), Excel, Google Sheets, data cleaning, data validation, exploratory data analysis (EDA), KPI reporting, trend analysis

Excel & Google Sheets: PivotTables, XLOOKUP/VLOOKUP, INDEX/MATCH, COUNTIF, IFERROR, FILTER, SORT, QUERY, ARRAYFORMULA, IMPORTRANGE, Power Query, conditional formatting, data validation

Data Visualisation & BI: Power BI, Tableau (currently learning), dashboard development, data visualisation, charts, filters and reporting

Programming & Machine Learning: Python, pandas, Scikit-learn, PyTorch, Random Forest, SVM, Neural Networks, PCA, SHAP

Tools & Development: Git/GitHub, Django, React.js, Google Workspace

PROFESSIONAL EXPERIENCE

Recruitment & Compliance Manager, Leopard Logistics – Amazon DSP *Oct 2025 – Present | Guildford, UK*

- Built and maintain a Google Sheets-based ClearQuote tracker covering 80+ drivers daily, using advanced formulas and cross-sheet data to automate completion monitoring and identify outstanding van checks, contributing to an increase in completion from approximately 30% to 90%.
- Produce weekly KPI reports for the Director and company owner, combining data from multiple operational sources to track successful application rates, compliance performance and ClearQuote completion, supporting recruitment and operational planning.
- Conduct weekly data validation and compliance audits across 60+ driver records, tracking 7–8 requirements and using structured checks, expiry monitoring and conditional formatting to improve overall compliance from approximately 65% to 95%.
- Manage and analyse a recruitment pipeline of 30+ applications per week, tracking candidates from application through screening, interview, document checks, background checks, training and hire, successfully onboarding 50+ drivers per month.
- Improved recruitment processes through more targeted applicant screening and streamlined background/document checks, reducing typical onboarding time from approximately 7 days to 3 days and unsuitable interviews from approximately 25 to 15 per week.

Data Analyst Intern, Uptrail

Jun 2025 – Jul 2025 | Remote

- Used Python, SQL and Excel to clean, transform and analyse datasets, including duplicate removal, missing-value handling and structured querying.
- Performed data analysis and developed dashboard outputs to communicate key metrics and findings, contributing to an approximately 30% improvement in reporting efficiency.
- Improved data-processing workflows, reducing manual data-cleaning effort by approximately 40%.

Data Analyst Intern, MeriSKILL

May 2024 – Jun 2024 | Remote

- Completed two data analysis projects using SQL, Excel and Power BI, including analysis of a diabetes dataset.

- Performed data cleaning, exploratory data analysis and SQL-based analysis, preparing datasets and identifying patterns for reporting and visualisation.
- Built Power BI dashboards and data visualisations to communicate analytical findings, contributing to a reported 25% increase in stakeholder engagement with data-driven insights.

Computer Lab Assistant, Asia Pacific University

Oct 2023 – May 2025 | Part-Time

- Provided individual and group technical support to 200+ students across Python, SQL and C programming, helping troubleshoot code and resolve technical issues.
- Explained programming and database concepts to students with varying levels of technical experience, strengthening technical communication and problem-solving skills.

PROJECTS

CancerXAI — Multi-Cancer Subtype Classification Platform

Final-Year Project | University of Surrey | Sep 2024 – May 2025

- Developed and deployed an end-to-end machine learning application to classify cancer subtypes from gene-expression data using Python, Scikit-learn, PyTorch, Django and React.
- Processed 100,000+ gene-expression features, comparing SVM, Random Forest and Neural Network models to improve classification accuracy from 65% to 80%, while using PCA to reduce dimensionality by 95%.
- Implemented SHAP explainability to interpret model predictions and identify influential features; project awarded a First-Class grade (70%+).

Echoes of Change — Volunteer Engagement Platform

University Group Project | Feb 2024 – May 2024

- Developed a Django-based volunteer engagement platform within a four-person team, incorporating personalised activity recommendations, participation tracking and leaderboards.
- Contributed across requirements analysis, development and testing, applying collaborative software development and problem-solving throughout the project lifecycle.

EDUCATION

BSc (Hons) Computer Science — 2:2

University of Surrey | 2023–2025 | Guildford, UK

- Final-Year Project: First-Class (70%+) — CancerXAI: Multi-Cancer Subtype Classification Platform
- Relevant Modules: Database Systems, Artificial Intelligence, Deep Learning & Advanced AI, Advanced Algorithms, Information Security Management, Computer Networking, Web Applications Development, Software Engineering Project

Foundation in Computing & Year 1 BSc (Hons) Computer Science Asia Pacific University | 2021–2023 | Kuala Lumpur, Malaysia

- GPA: 3.62/4.00
- Relevant study included Python Programming, Databases, Artificial Intelligence, Systems Analysis & Design, C Programming, and Operating Systems & Computer Architecture.

CERTIFICATIONS

Microsoft Excel: Excel from Beginner to Advanced — Udemy | 2025

The Complete SQL Bootcamp: Zero to Hero — Udemy | 2025

Tableau A-Z: Hands-On Tableau Training for Data Science — Udemy | In Progress

Cisco Academy CCNav7: Introduction to Networks | 2023

ADDITIONAL INFORMATION

Languages: English, Bahasa Malaysia, Tamil

Volunteering: Kechara Soup Kitchen; Techstars Startup Weekend; University of Surrey Freshers Angel & Welfare Watch
