Guildford, UK | +44 7771602273 | atriya0712@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

UK Graduate Visa – Valid until October 2027

PROFESSIONAL SUMMARY

Computer Science graduate with hands-on experience across software development, data analysis and technology-driven process improvement. Experienced in Python, SQL, Django, React and Git/GitHub, with practical experience developing and deploying full-stack applications, working with data and solving technical problems. Built a First-Class final-year machine learning application combining predictive modelling, explainable AI and web development. Currently apply technology and data-driven solutions to improve operational processes within an Amazon DSP environment.

TECHNICAL SKILLS

Programming & Data: Python, SQL (Intermediate), pandas, C, data structures & algorithms, object-oriented programming (OOP)

Web Development: Django, React.js, HTML, CSS, REST APIs, full-stack web application development

Machine Learning & AI: Scikit-learn, PyTorch, Random Forest, SVM, Neural Networks, PCA, SHAP

Databases & Analytics: SQL, database systems, Excel, Google Sheets, data cleaning, data analysis

Tools & Technical Foundations: Git/GitHub, Google Workspace, Amazon Cortex, computer networking, information security, software development lifecycle (SDLC)

PROJECTS

CancerXAI — Multi-Cancer Subtype Classification Platform

Final-Year Project | University of Surrey | Sep 2024 – May 2025

- Designed, developed and deployed a full-stack machine learning web application that allows users to upload gene-expression data and receive predicted cancer subtype classifications.
- Built and evaluated SVM, Random Forest and Neural Network models using Python, Scikit-learn and PyTorch, improving classification accuracy from 65% to 80% across 100,000+ gene-expression features.
- Applied PCA to reduce feature dimensionality by 95% and implemented SHAP explainability to improve the transparency and interpretability of model predictions.
- Integrated the machine learning pipeline into a web application using Django and React, using Git/GitHub for version control; project awarded a First-Class grade (70%+).

Echoes of Change — Volunteer Engagement Platform

University Group Project | Feb 2024 – May 2024

- Developed a Django-based web application within a four-person team, incorporating personalised activity recommendations, participation tracking and leaderboards.
- Contributed across requirements analysis, development and testing, collaborating throughout the software development lifecycle to deliver the completed platform.

PROFESSIONAL EXPERIENCE

Recruitment & Compliance Manager, Leopard Logistics – Amazon DSP *Oct 2025 – Present | Guildford, UK*

- Built and maintain a Google Sheets-based ClearQuote tracker covering 80+ drivers daily, using advanced formulas and cross-sheet data to automate completion monitoring and improve completion rates from approximately 30% to 90%.
- Redesigned recruitment and onboarding workflows across screening, document verification, background checks and candidate communication, reducing typical onboarding time from approximately 7 days to 3 days.
- Use Amazon Cortex, Google Sheets and Google Workspace to manage operational information, track driver and applicant status, validate records and support day-to-day decision-making.

- Recovered and validated 70+ applicant records following a recruitment spreadsheet failure by cross-checking information across Amazon Cortex and direct candidate records, restoring accurate application tracking.
- Coordinate across recruitment, operations, drivers, senior management and Amazon station teams to resolve operational issues and translate business requirements into structured processes.

Data Analyst Intern, Uptrail

Jun 2025 – Jul 2025 | Remote

- Used Python, SQL and Excel to clean, transform and analyse datasets, including duplicate removal, missing-value handling and structured querying.
- Improved data-processing and reporting workflows, reducing manual data-cleaning effort by approximately 40% and contributing to an approximately 30% improvement in reporting efficiency.

Data Analyst Intern, MeriSKILL

May 2024 – Jun 2024 | Remote

- Used SQL, Excel and Power BI across two analytical projects, performing data cleaning, exploratory analysis and dashboard development.
- Analysed structured datasets and developed visualisations to communicate technical findings, strengthening practical experience translating data into understandable outputs.

Computer Lab Assistant, Asia Pacific University

Oct 2023 – May 2025 | Part-Time

- Provided technical support to 200+ students across Python, SQL and C programming, troubleshooting code, identifying errors and helping users resolve technical problems.
- Explained programming and database concepts to users with varying levels of technical experience, developing strong technical communication and problem-solving skills.

EDUCATION

BSc (Hons) Computer Science — 2:2

University of Surrey | 2023–2025 | Guildford, UK

- Final-Year Project: First-Class (70%+) — CancerXAI: Multi-Cancer Subtype Classification Platform
- Relevant Modules: Software Engineering Project, Advanced Algorithms, Database Systems, Web Applications Development, Artificial Intelligence, Deep Learning & Advanced AI, Computer Networking, Information Security Management

Foundation in Computing & Year 1 BSc (Hons) Computer Science *Asia Pacific University | 2021–2023 | Kuala Lumpur, Malaysia*

- GPA: 3.62/4.00
- Relevant study included Python Programming, C Programming, Databases, Systems Analysis & Design, Web Applications Development, Operating Systems & Computer Architecture, and Artificial Intelligence.

CERTIFICATIONS

Cisco Academy CCNAv7: Introduction to Networks — 2023

The Complete SQL Bootcamp: Zero to Hero — Udemy | 2025

Microsoft Excel: Excel from Beginner to Advanced — Udemy | 2025

Tableau A-Z: Hands-On Tableau Training for Data Science — Udemy | In Progress

ADDITIONAL INFORMATION

Languages: English, Bahasa Malaysia, Tamil

Volunteering: Kechara Soup Kitchen; Techstars Startup Weekend; University of Surrey Freshers Angel & Welfare Watch
