

Atriya Sivakumar

Guildford, UK | +447771602273 | atriya0712@gmail.com | [LinkedIn](#) | [GitHub](#)

Graduate Computer Science student specialising in machine learning, data analytics, and full-stack development. Delivered production-grade AI and web solutions using Python, Django, React.js, AWS, and SQL, boosting performance by 40% and user engagement by 35%. Improved model accuracy by 15% in a multi-cancer classification project deployed with SHAP-based interpretability for decision-makers.

Education

University of Surrey

Guildford, UK | (Sep 2023 – Jun 2025)

BSc (Hons) Computer Science, (Second & Final Year)

- **Key Modules:** Artificial Intelligence, Deep Learning & Advanced AI, Advanced Algorithms, Web Applications Development, Computer Networking, Software Engineering Project, Information Security Management, Database Systems
- **Key Achievement:** Awarded a **First-Class (70%)** for final-year project, designed and implemented a cancer classification web application using 100,000+ gene expression features, achieving a **15% accuracy improvement** over baseline models.

Asia Pacific University

Kuala Lumpur, MY | (Jun 2021 – May 2023)

Foundation in Computing & Year 1 BSc (Hons) Computer Science

- **GPA:** 3.62/4.00
- **Key Modules:** Python Programming, C Programming, Databases, Operating Systems & Computer Architecture, Systems Analysis & Design, Web Applications Development, Artificial Intelligence
- **Key Achievement:** Awarded **top grades** in programming modules for consistently delivering efficient and well-documented solutions and earned the **Cisco Academy CCNAv7 – Introduction to Networks** certification.

Certifications: Cisco Academy CCNAv7 – Introduction to Networks

Technical Skills

Programming: Python (Advanced), SQL (Advanced), Java (Intermediate), C (Intermediate), JavaScript (Intermediate)

Web Development: Django (Advanced), HTML/CSS (Advanced), React.js (Intermediate), Next.js (Beginner)

Machine Learning: Scikit-learn (Advanced), PyTorch (Intermediate), PCA, SHAP, Random Forest, SVM

Cloud & Tools: Git/GitHub (Advanced), Power BI (Advanced), AWS EC2/S3 (Intermediate), Docker (Intermediate), Tableau (Intermediate)

Professional Experience

Talent Acquisition & Compliance Manager - Leopard Logistics, Amazon DSP

(Oct 2025 – Present)

- Led end-to-end recruitment for delivery drivers, sourcing and onboarding **150+ candidates per month** with a **35% faster time-to-hire** through streamlined screening and documentation workflows.
- Ensured full compliance with Amazon DSP standards by conducting daily vehicle, and document audits, maintaining a **98–100% compliance score** across the fleet.
- Managed daily workforce planning for **40–100+ active drivers**, improving route coverage reliability by 30% through proactive scheduling and attendance tracking in collaboration with the operations team.
- Maintained accurate onboarding files and performance documentation, reducing administrative errors by **over 80%** through improved record-keeping systems.
- Implemented structured onboarding, training, and compliance tracking processes that improved new-hire readiness and cut onboarding delays by 60%.

Data Analyst Intern – Uptrail

(Remote, Jun–Jul 2025)

- Performed **data analysis** on 500K+ row datasets, transforming raw data into actionable insights that improved project decision-making speed and accuracy.
- Designed and deployed interactive **Power BI** and **Tableau dashboards**, reducing reporting time by **30%** and improving stakeholder access to real-time metrics.
- Automated **ETL workflows** with **Python** and **SQL**, cutting manual data-cleaning effort by **40%** and minimising human error.

Data Analyst Intern – MeriSKILL

(Remote, May–Jun 2024)

- Delivered comprehensive **statistical analyses** for two client projects, influencing strategic recommendations and business outcomes.
- Created dynamic Power BI and Tableau dashboards that increased stakeholder engagement by **25%** (feedback surveys), improving adoption of data-driven decision-making.

Computer Lab Assistant – Asia Pacific University

(Part-Time, Oct 2023–May 2025)

- Provided one-on-one and group coding support to **200+ students** in Python, SQL, and C, contributing to an **average 20% grade improvement** in programming modules.
 - Resolved **90%+** of technical issues on first contact, increasing lab productivity and reducing support backlog by **35%**.
-

Projects

CancerXAI – Final Year Project

(Sep 2024 – May 2025)

- Developed a **production-ready** full-stack web application for real-time cancer subtype classification using Django, React.js, and Scikit-learn, processing **100,000+ genomic features**.
- Applied PCA to reduce dimensionality by **95%**, boosting inference speed without loss in accuracy.
- Trained and compared SVM, Random Forest, and Neural Network models, achieving **15% accuracy improvement** over baseline (65% → 80%).
- Integrated SHAP-based explainability, enabling **non-technical medical stakeholders** to interpret gene importance and improve trust in predictions.

MomentumX

(Mar 2025 – Present)

- Building a **gamified social fitness application** with React.js and Node.js to drive community engagement through leaderboards, streak tracking, and fitness challenges.
- Conducted iterative **user testing with 30+ beta participants**, resulting in a **35% increase** in active user participation compared to early engagement benchmarks.
- Designing a scalable back-end to support **1,000+ concurrent users** upon full launch.

Echoes of Change

(Feb – May 2024)

- Created a volunteer engagement platform using Django with **personalised activity recommendations**, leaderboards, and real-time tracking to boost retention.
 - Delivered a streamlined onboarding flow, achieving a **90% positive UX score** from **50+ pilot users** and increasing sign-up completion rates by **20%**.
 - Collaborated with a **4-member cross-functional team** to align technical features with non-profit operational needs.
-

Additional Information

- Strong collaboration and communication skills demonstrated through cross-functional teamwork in academic, client, and internship projects.
- Adaptable and quick to learn new technologies, proven by delivering projects in both familiar and new tech stacks (e.g., Django, React.js, AWS).
- Volunteering experience including community service (Kechara Soup Kitchen), tech events (Techstars Startup Weekend), and university initiatives (Freshers Angel, Welfare Watch).
- Native speaker in English, Bahasa Malaysia, and Tamil.
